✓ Question 1 of 37

Juan Delgado is an employee in your sales department and Li Park is an outside consultant. If you share a dashboard with both of them, will there be any difference in their Power BI experience?

✓ Li Park will have the interactivity of the dashboard, but she will not have any of the elements on the left.

Li Park will not be able to view the dashboard because she is not in your company's domain.

Both Juan Delgado and Li Park will have the same experience if they both have Power BI installed.

Both Juan Delgado and Li Park will only be able to see the dashboard in a browser and not any of the elements on the left.

✗ Question 2 of 37

You want to allow users inside your organization to share your dashboard, and to edit your dashboard by adding tiles. How will you do this?

✗ Share your dashboard with internal users.

Publish the dashboard as a contact pack.

Publish the report on the web.

✓ By creating a dashboard in a group.

✓ Question 3 of 37

In order to improve your dataset to get the most use from the Power BI Q&A feature, how should you name the tables in your data?

Do not use data models from Power Pivot.

Avoid names that describe the table.

✓ Choose user-friendly names for your tables.

Name your tables numerically.

✓ Question 4 of 37

If you build a dashboard using Quick Insights, in which format will the insights appear on your dashboard?

annotations

Excel tables

text boxes

visualizations

 Question 5 of 37

Which of these is a reason to relate tables in Power BI?

 so you can create data models with multiple datasets

so you can examine relationships between different datasets

so you can have consistent table headings in your dataset

so you can have multiple tables in your dashboard

 Question 6 of 37

Which video types are the only ones you can add to a dashboard as a media tile?

YouTube or Vimeo

Vimeo or Twitter

YouTube or Pinterest

Vimeo or Pinterest

 Question 7 of 37

What does the Unpivot feature in a dataset allow you to do?

Transpose the data so it displays longer vertically and not as wide.

Retrieve the underlying rows of data from a pivot table

Trim your data, such as getting rid of leading and trailing spaces.

Rename a column without affecting the data source.

✓ Question 8 of 37

You have a filtered dataset for Customer Sales with some null value rows. You want to remove these rows completely. How will you do this?

✓ Deselect (null) in the pull-down menu for Customer Sales in the Power Query Editor.

Deselect (blank) in the pull-down menu for Customer Sales in the dataset.

Change the filter so null value rows are not displayed.

Place your cursor to the left of the rows, and then select Delete.

✗ Question 9 of 37

You are doing a research project on population changes, and the U.S. Census website has the data you want. Which data type should you download so you have the easiest format to read?

✓ the table

the list

✗ the spreadsheet

the dataset

✓ Question 10 of 37

You are conducting a large meeting in which you want to make a presentation of a report on a screen. How can you do this with the Windows app?

✓ Switch to full screen in the application so you will automatically go into Presentation mode, which displays all your visualizations.

Switch to full screen in the application so you will automatically go into Presentation mode, but you will lose any custom visualizations.

Select Presentation mode, as long as you have Windows 7 or later, which will display all your visualizations.

Select Slide Show, which will display your report and custom visualizations sequentially each time you select Next Page.

✓ Question 11 of 37

Katrina is an experienced Power BI service user. When would Katrina choose to work in Power BI Desktop instead?

✓ Question 12 of 37

If you would like to examine some of the free sample datasets, reports, and dashboards in Power BI, where will you find them?

by clicking Get Data

by clicking My Workspace

by clicking Services

by clicking Apps

Question 13 of 37

As you are working in a workspace on your iPad, you receive a notification. What is the notification about?

A collaborator is sending you a notification about your work together.

A collaborator has opened the workspace you are working in.

Power BI for Mobile is informing you other collaborators are in Power BI.

You are asked whether the dashboard is ready to be published.

Question 14 of 37

If you upload data to a file stored locally, when does the data refresh?

Data in a file stored locally is not refreshed.

Data in a file stored locally is refreshed hourly.

Data in a file stored locally is refreshed every 24 hours.

Data in a file stored locally is refreshed as changes are made.

Question 15 of 37

What feature does Power BI for Mobile have to make sharing Power BI dashboards easier than sharing other types of information with a mobile device?

Power BI for Mobile includes an annotation feature.

Power BI for Mobile takes its own screen captures.

Power BI for Mobile allows you to save the dashboard as a link.

Power BI for Mobile can share dashboards via sharing apps directly from the screen.

✓ Question 16 of 37

When you embed a Power BI report in SharePoint Online, what are you actually doing?

embedding the report as a navigable presentation

✓ adding a web part by pasting the report link

adding a site page by pasting the report link

embedding the report as a website

✓ Question 17 of 37

How does using Power BI impact an organization's IT resources?

IT professionals can spend their time creating reports rather than providing data to analysts.

The IT department will be responsible for creating visualizations with Power BI.

✓ IT professionals can spend their time providing data to analysts rather than creating reports.

The IT department will be the primary resource using Power BI.

✓ Question 18 of 37

What will happen if you run Power BI with a display resolution lower than 1440 x 900?

You will receive an error message to increase your display resolution.

Power BI will reduce the font size so you can see the tools.

Your text display setting will need to be changed to greater than 100%.

✓ Tools will continue to display but you will not be able to see them.

✓ Question 19 of 37

After you created an app workspace, you offered the app to your entire sales department for feedback. Which version of the app will those users see when they access the app? >

✓ Question 20 of 37

If you create an app workspace, how do the collaborators you selected create their own reports and dashboards?

They are created in an offline version of My Workspace.

They are created as drafts posted to your workspace for approval.

They are created the same way you created them in My Workspace.

They are created by emails sent to you for approval.

✓ Question 21 of 37

Why would you create an app workspace?

so you can have collaboration in creating and sharing data, reports, and dashboards

so you can limit these individuals who have admin authority over the workspace

so you can assign individuals to view the Power BI content you share

so your collaborators can access the app workspace from a mobile device

✓ Question 22 of 37

Why would you add a slicer in a table visualization?

so the slices in a pie chart can be compared to a particular goal

so your users can slice-out data they are not interested in

so your users can filter the particular data they are interested in

so the data in each slice of a pie chart will show the underlying data when clicked on

✓ Question 23 of 37

How will a gauge visualization provide impressive one-glance information on your company's sales for the year?

It can show what percent of salespeople are on track to reach the sales goal.

It can show how each salesperson is "gauged" against the other salespeople.

It can show how close your sales are to your sales goal.

It can show the salespeople who have the highest sales for the year.

✓ Question 24 of 37

In which situation would you have a higher-value visualization in terms of performing data analysis with a treemap rather than with a pie chart?

You want to look at a higher level of detail in a category.

You want your legend to wrap in the content area.

You prefer to have the data displayed in the form of a table.

You want to distill your data into categories.

Question 25 of 37

How can you create portable reports?

Create the report in Power BI Desktop, and then work with it in Power BI service.

Create the report in Power BI service, and then work with it in Power BI Desktop.

Get your data with Power BI service, and then download the PBIX file.

Get your data with Power BI Desktop, and then download the CSV file.

Question 26 of 37

When would you use Power BI service rather than Power BI Desktop?

Question 27 of 37

Your visualization is in the form of a column chart showing annual sales by salesperson. How can you add an additional visualization to the chart to show your company's sales goal for the year?

Add a Constant Line from the Analytics tab.

Modify the X-Axis from the Formatting tab.

Modify the Y-Axis from the Analytics tab.

Add a Constant Line in the Formatting tab.

Question 28 of 37

You have three tables relating to sales information in various states and various products. Why would you create relationships in Power BI?

to work in one table and not the three separate tables

to identify customers with more than one location

to merge the three tables into a single table

to quickly navigate between the multiple tables

✓ Question 29 of 37

When would you save and modify a sample report rather than create a new report from scratch?

when you do not have the information you want in the Fields list

when you do not have access to the sample report

✓ when the sample report contains most of the visuals you want

when you do not have Power BI Desktop installed

✗ Question 30 of 37

The dataset you are working in is a PivotTable. What will happen if you select the first column, Sales Region, then you click Unpivot Other Columns?

✓ The other columns will change from a PivotTable to rows of data.

✗ The other columns will change to rows, and the rows will change to columns.

The column headings can be renamed however you prefer.

The other columns will change from rows of data to a PivotTable.

✓ Question 31 of 37

What data file type can you access only with Power BI Desktop and not Power BI service?

SQL

Excel

CSV

✓ XML

✓ Question 32 of 37

When you pin a visualization from a report to a dashboard, what does the visualization become?

a tile

a data field

a filter

a link

Question 33 of 37

Suppose your report is going to be used in a PowerPoint presentation at the national sales meeting. With that in mind, what should be the most important consideration when you are creating your report?

how to have charts rather than tables appear on different pages

how you are going to group elements on a page

how long it will take to export your report to PowerPoint

how many visualizations you can fit on a PowerPoint page

Question 34 of 37

When you edit interactions, you choose to not have the data filtered. Once you stop editing the interactions, what happens when a user selects an item?

The charts change, but the tables do not change.

The tables change, but the charts do not change.

The tables and charts redisplay, but nothing changes.

The inability to filter is displayed as an error message.

Question 35 of 37

What must you do if you want users to see a tile using a QR code you shared with them?

Create the QR code on a printed item, not on a presentation screen.

Open the tile in Focus Mode, and then select Generate QR code.

Share the report with the users whom you want to see the tile.

Share your dashboard with users whom you want to see the tile.

 Question 36 of 37

You found a thermometer in the Marketplace that you think will add more value to your visualizations than the gauge you are using. Which values will you have when you add the thermometer?

All the values contained in the Visualizations pane in Power BI.

 The values that are included in the thermometer you add from the Marketplace.

The values that were in the gauge you used before you downloaded the thermometer.

All the values in the Fields list generated from the dataset you used.

 Question 37 of 37

You have a slicer and a chart on the same page for your sales data by state. If you use the menu to sort by territory in alphabetical order, what effect will that have on the slicer and the chart?

 Everything on the page will be sorted alphabetically by territory.

Only text items will be sorted alphabetically by territory, but chart items must be sorted separately.

The chart will be sorted alphabetically by territory, but the slicer will be unchanged.

The slicer will be sorted alphabetically by territory, but the chart will be unchanged.
